Job Req #: 071043337XPRT

Job Category: Embedded Firmware/Software Engineer

XPRT Solutions, Inc. – A DSCI Company (www.xprtsol.com / www.dsci.com), is a small high technology company that develops, markets, licenses and operates advanced communication devices as well as provides Modeling and Simulation tools and services to a large number of US Army and other DoD organizations. We currently have several positions open at our Eatontown, NJ, headquarters for entry level and experienced Embedded Firmware/Software Engineers. In these positions, you will be involved with embedded firmware/software development from conception through production. This includes responsibility for device and controller firmware, and software utility tools development. Additionally, as an integral part of a team, you will participate in the design and technical reviews of product software requirements; and generate and document the software releases.

Skills/Experience:

- Candidates with strong background in embedded software design on embedded processors are preferred.
- Should have hands-on experience in implementation of real-time software, device drivers, and hardware-software interfaces.
- Hands-on experience with real-time embedded operating systems such as embedded Linux, VxWorks, etc. is desirable.
- Strong C/C++ development skills are required. Knowledge of communication protocols is a definite plus.

Candidates must be US citizens or green card holders and have a minimum of a BS degree in Computer Engineering, Computer Science or Electronic Engineering, with an advanced degree desirable.

XPRT Solutions is an employee owned company and offers an outstanding employment package, including highly competitive salaries, medical, dental, and vision insurance, tuition reimbursement, and 401K plan with employer contribution.
